About each fifteen days after the "Coming Out Party" for Spring has been finished, I apply one cup of 2-8-10. This application should never be closer to the base of the plant than fifteen inches. Then water, water, water. Repeat this application every three weeks throughout the summer and keep your plants well watered always. You will have ribbon winners for every show, and your flowers will be the talk of the town.

Keep a lookout for pests, such as aphids and scale. Should it be necessary to spray, I find the use of Em-Nik very effective. Of course it is to be used as directed on the can. It is a liquid spray and is useful for all types of pest control in your garden.

If you follow this routine, I will be seeing you at the shows. You have to give a lot of your heart and hand in growing flowers, but the satisfaction and personal pleasure is well worth your best effort.

A young prep-school lad is trying to decipher the following letter from his current girl friend: "Dear John, I hope you are not still angry. I want to explain that I was really joking when I told you I didn't mean what I said about reconsidering my decision not to change my mind. Please believe I really mean this. Love, Grace."
